

SafeHer AI - 5 Day Hackathon Roadmap

Project Goal

Build an AI-powered women's safety platform with two major modules:

- Anonymous AI Complaint System
- SOS Emergency System

The demo should showcase AI integration, live location sharing, emergency detection, and a professional admin dashboard.

DAY 1 - Project Foundation & Environment Setup

Estimated Time: 8-10 Hours

Task 1.1 - Create Project Structure

- ☐ Create root folder `safeher-ai`
 - ☐ Create project folders
 - ☐ frontend/
 - ☐ backend/
 - ☐ docs/
 - ☐ Initialize Git repository
 - ☐ Create `.gitignore`
 - ☐ Create `README.md`
 - ☐ Push initial commit
-

Task 1.2 - Backend Setup

- ☐ Initialize Node.js project
- ☐ Install dependencies
- ☐ express
- ☐ mongoose
- ☐ cors
- ☐ dotenv
- ☐ multer
- ☐ bcrypt
- ☐ jsonwebtoken

- ☐ axios
 - ☐ Create backend folder structure
 - ☐ controllers
 - ☐ routes
 - ☐ models
 - ☐ middleware
 - ☐ services
 - ☐ utils
 - ☐ Configure Express server
 - ☐ Connect MongoDB Atlas
 - ☐ Test API
-

Task 1.3 - Frontend Setup

- ☐ Create React project using Vite
 - ☐ Install dependencies
 - ☐ Tailwind CSS
 - ☐ React Router
 - ☐ Axios
 - ☐ React Hot Toast
 - ☐ React Leaflet
 - ☐ Create frontend folder structure
 - ☐ pages
 - ☐ components
 - ☐ services
 - ☐ hooks
 - ☐ context
-

Task 1.4 - Database Design

Create collections

- ☐ Users
 - ☐ Complaints
 - ☐ Emergency Contacts
-

Task 1.5 - UI Planning

Design pages

- ☐ Landing Page
- ☐ Complaint Page

- [] SOS Page
 - [] Admin Dashboard
-

DAY 2 - AI Complaint System

Estimated Time: 10 Hours

Task 2.1 - Complaint Form

Build complaint form

- [] Incident Title
 - [] Description
 - [] Location
 - [] Date & Time
 - [] Anonymous Toggle
-

Task 2.2 - Evidence Upload

Allow uploading

- [] Images
- [] Videos
- [] Audio

Store files using Cloudinary.

Task 2.3 - AI Complaint Analyzer

AI should extract

- [] Incident Type
 - [] Severity
 - [] Location
 - [] Summary
 - [] Suggested Category
-

Task 2.4 - Complaint Draft Generator

Generate a structured police complaint draft automatically.

Task 2.5 - Complaint History

Dashboard should display

- [] Complaint ID
 - [] Date
 - [] Status
 - [] AI Summary
-

DAY 3 - SOS Emergency Module

Estimated Time: 10 Hours

Task 3.1 - SOS Button

Create large emergency button

On click

- [] Confirmation
 - [] Trigger Emergency Flow
-

Task 3.2 - Live Location

Use Browser Geolocation API

Capture

- [] Latitude
- [] Longitude

Display location on interactive map.

Task 3.3 - AI Emergency Detection

Classify messages into

- [] Normal
- [] Medium Risk
- [] High Risk

- ☐ Emergency

Example

Message

Someone is following me.

↓

High Risk

Message

Someone is trying to kidnap me.

↓

Emergency

Task 3.4 - Emergency Record

Store

- ☐ Time
 - ☐ GPS Coordinates
 - ☐ Emergency Status
-

Task 3.5 - Emergency Alert Screen

Display

- ☐ Emergency Detected
 - ☐ Live Location Shared
 - ☐ Authorities Notified (Demo)
 - ☐ Trusted Contacts Notified (Demo)
-

DAY 4 - Dashboard & WhatsApp Integration

Estimated Time: 8 Hours

Task 4.1 - WhatsApp Bot (Demo)

User sends

HELP

Bot replies

- ☐ Emergency detected
 - ☐ Share your location
 - ☐ Incident recorded
-

Task 4.2 - Backend Integration

Connect

Website

↓

Backend API

↓

AI Engine

↓

Database

↓

Dashboard

Task 4.3 - Admin Dashboard

Create analytics cards

- ☐ Total Complaints
- ☐ Emergency Cases
- ☐ Pending Complaints
- ☐ Today's Incidents

Task 4.4 - Complaint Details

Display

- ☐ Complaint
 - ☐ AI Summary
 - ☐ Uploaded Evidence
 - ☐ Location
 - ☐ Severity
-

Task 4.5 - Live Emergency Feed

Display latest emergencies

- ☐ Incident ID
 - ☐ Time
 - ☐ Location
 - ☐ Priority
-

DAY 5 - Polish, Deployment & Presentation

Estimated Time: 8 Hours

Task 5.1 - UI Polish

- ☐ Responsive Design
 - ☐ Loading Animations
 - ☐ Error Handling
 - ☐ Success Toasts
 - ☐ Better Colors & Icons
-

Task 5.2 - Testing

Test complete flow

- ☐ Complaint Submission
- ☐ AI Analysis
- ☐ File Upload
- ☐ SOS Flow
- ☐ Dashboard Updates

Task 5.3 - Deployment

Deploy

Frontend

- [] Vercel

Backend

- [] Render

Database

- [] MongoDB Atlas
-

Task 5.4 - Demo Flow

Scenario 1

Anonymous Complaint

↓

AI analyzes complaint

↓

Complaint Draft Generated

↓

Complaint stored

↓

Dashboard updated

Scenario 2

User presses SOS

Location captured

AI detects Emergency

Emergency stored

Dashboard updates instantly

WhatsApp bot receives HELP (Demo)

Authorities & Trusted Contacts notified (Simulation)

Task 5.5 - Final Presentation

Prepare

- ☐ Problem Statement
 - ☐ Existing Challenges
 - ☐ Proposed Solution
 - ☐ System Architecture
 - ☐ AI Workflow
 - ☐ Live Demonstration
 - ☐ Future Scope
-

Final Deliverables

Core Features

- ☒ Anonymous Complaint Filing
- ☒ AI Complaint Analysis

- ☒ AI Complaint Draft Generation
 - ☒ Evidence Upload
 - ☒ SOS Emergency Button
 - ☒ Live Location Sharing
 - ☒ AI Emergency Detection
 - ☒ Admin Dashboard
 - ☒ WhatsApp SOS Demo
 - ☒ Deployed Application
-

Future Scope

- Police Portal Integration
- Real WhatsApp Business API
- Repeat Offender Detection
- Complaint Heat Maps
- Voice Complaint Support
- Multilingual AI Assistant
- Community Safety Alerts
- Safe Route Recommendations
- Nearest Police Station Finder
- Trusted Contact Live Tracking
